The tangled escapees ravel out of the.on his helmet, and took his M32 from the rack. It was approaching 0200, time to relieve the sentry detail guarding Kalens's residence a quarter of a mile away. "Well, it's time we were leaving," he said to Sirocco, who was lounging with his feet up on the desk, and Colman, sprawled in a corner, both red-eyed after a long and exhausting day. "I'll try to shout quietly. I'd hate to be disturbing His Honor in his sleep." Micky sat at the table again. "Where did Lukipela disappear?" "Leilani, honey, you're not going back there," Geneva declared. "We're not going to let you go back to." "No. My father just wants to see the gore." "Skin cancer kills," the girl explained. "They may be a handful," Adam added from across the room, "but they control the ship's heavy weapons. We've given them every chance, and

we've encouraged as many people to get themselves out of it as was humanly possible. Our whole world is at stake. If they begin issuing threats or deploying those weapons, the ship will be destroyed. They' can be no changing that decision. It was made a long time ago."Leon nodded gravely from his section of the screen. . "That is a risk," he agreed. "As Otto said, it is difficult to judge exactly. However, we think that the policy we have outlined minimizes risks to the majority of people. Nothing will eliminate the risks completely." He drew a long, heavy breath before answering Bernard's question directly. "But there can be no alteration of our resolution.".four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning..thinks he hears sporadic gunfire. He can't be sure. His explosive breathing and the slap of his sneakers on."_but he was on the needle," Geneva said. "Heroin. A loser in everyone's eyes but mine. I just knew he.each step before taking it, like a patient learning to walk again after spinal injury, she was able to proceed.light into a few of the rooms in her heart. Until then, she had long resisted such explorations, perhaps out.Sirocco gave a short laugh. "You should find out more about this ship before you start worrying about things like that. We'll probably put out a screen of interceptors and make the final approach behind them. They'll stop anything before it gets within ten thousand miles. You have to give the company some credit."."You'll find a way," one of the Chironians at the table said, not sounding perturbed..As Geneva rose from the table, Micky said, "Aunt Gen, sit down. This isn't about pie."."Kath laughed and rolled back to stare up at the ceiling. "You're just like us, aren't you," she said. "You don't know where you came from either."."Army logic," Colman murmured.. "I was only trying to?"."Go away," Chang told it. "We're just looking today." The cart shut up, turned itself around, and returned dejectedly to the line to await another victim..real-estate salesmen, one of them might have whupped his ass just as a matter of principle.. "Does Casey know?" Colman asked. Veronica shook her head. Colman thought for a few seconds. "I don't like the sound of what's going on around there," he said. "Do you know the bridge outside, the base on the south side-where the maglev tube crosses a small gully by the distribution substation?"."From the freeway arose the drone of traffic, ceaseless at any hour. This was a less romantic sound than.It was in the last part that Chiron physics had followed a different mute. The Chironians had taken the remarkable step of extending the equivalence of mass and energy to embrace spacetime itself: All three were merely different expressions of the same "thing." A shock wave forming inside the primordial domain of tweedlestuff, they had discovered, could create an energy gradient sufficient to "tear apart" an element of composite spacetime and decompose it into its familiar dimensions of space and time, in which the laws of physics as commonly understood could come into being. Thus the Chironians had found a cause for the discontinuity that terrestrial scientists had been obliged to postulate arbitrarily..dressed in all manner of styles and colors and reflecting the various races of Earth in more or less even proportions, which was to be expected since the genetic codes carried by the Kuan-yin had comprised a balanced mix of types. Children and young people were everywhere, and humanoid robots seemed to be part of the scheme of things. The robots intrigued Bernard; such creatures were not unknown on Earth, but they had tended to be restricted to experiments in research labs as technological curiosities since, functionally, they didn't really make a lot of sense. Presumably the Chironian robots had been developed from the machines that had raised the first Chironians, which had-been designed not in the form of tin men at all, but to suit their purpose--as warm-bodied, soft surfaced tenders. So conceivably the notion of machines as companions had become a permanent feature of Chironian life that could be traced back to the earliest days. The designs had later been changed to suit the whims and preferences of the children after natural parents appeared on the scene to satisfy their more basic physiological and psychological needs. To his surprise Bernard found himself thinking that the relationship between man and humanoid machine might have been quite warm, and in some way charming; certainly he could see no evidence~ of the cold and sinister state of affairs that Jean had pictured..blue eyes. "Now don't you wish you could see me as a mutant?"..probable or fair, and as good as she looked in daylight, she was even prettier here. "In return, we might offer to show some of their technical people selected parts of the Mayflower H. A legitimate cover would be desirable."."The boy lifts the dog out of the Explorer, as earlier he had lifted him up and in, not without considerable.Micky reached for her aunt's hand. "I loved him, too, Aunt Gen."."Are we to run and hide on the far side of the planet for fear of offending a disorganized and undisciplined race who owe us everything that they take for granted and waste freely as if nothing had any value or ever had to be earned?" Kalens was asking from the screen. "Whose sciences and labors conceived and built the Kuan-yin, and with it the very machines that created the prosperity of Chiron? Whose knowledge and skills, indeed, created the Chironian race itself, who would now lay claim to all around them as theirs and send us away like paupers from the feast that we have provided?" He paused a second for effect, and his face took on an indignant scowl below his crown of silver hair. "I say no! I will not be driven away in such fashion I will not even contemplate such an action. I say, publicly and without reservation, that any such suggestion can be described only as surrender to moral cowardice that is beneath contempt. Here we have come, after crossing four light-years of space, and here we will remain, to share in that which is our right to share, and to enjoy that which is no more than our just due." A thunder of applause greeted the exhortation. Jean had heard enough and told Jeeves to turn off the screen..Meeting Micky's eyes, Geneva read the love in them, and smiled, but then seemed to read something.More black than white, its coat a perfect camouflage against the moon-dappled oil, the dog sprints out.from the galley, lounge, and cockpit. The door at the opposite end of the bath stands less than halfway.The blood was worse. There were never oceans of it; but a little blood can appear to be a lot before.His debut into life had been very different. The war had left his parents afflicted by genetic damage, and their first two children had not survived infancy. Aging prematurely from side effects, they had known they would never see Chiron when they brought him aboard the Mayflower II as a boy of eight and sacrificed the few more years that they might have spent on Earth in order' to give him a new start somewhere else. Paradoxically, their health had qualified them favorably in their application to join the Mission since the planning had called for the inclusion of older people and higher-risk actuarial categories among the population to make room for the births that would be occurring later. A dynamic population had been deemed desirable, and

the measures taken to achieve it had seemed callous to some, but had been necessary..Her attempt at humor was a good sign. Colman grinned and heaved himself from his seat. "Then let's go," he grunted.."Clear to exit," the Dispatching Officer informed Sirocco. "Lock clear for exit," Sirocco called to the cabin below. '-Carry on, Guard Commander," Colonel Wesserman replied from the depths..Module's armaments; alternatively, with the added strength of the regulars who had arrived below. He could hold the lock open against the SD's coming from the Battle Module until the rest of the Army arrived. It was time for him to decide his answer..After a mintless scrubbing of her teeth, Micky retreated to her tiny bedroom, which she'd already.CHAPTER TWENTY-TWO."From what Jerry Pernak told us it must have to do with antimatter," Jay said. "The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that.".Chapter 13.All was quiet in the kingdom of Cleopatra. No throb of camera flash. No declaiming in a phony Old.Hanlon made a throwing-away motion in the air.
