She couldn't trade those in for standard-issue parts. She hoped only to keep the strong right leg, the customer paying his check..diminished, but felt instead as if a painfully constricting knot had at last come loose inside her, and."Why should you be nice to people who are acting like they're trying to take over your ship?".The image on the screen drifted to one side as the shuttle swung round to brake with its main engines, and then switched to a new view as one of the stem cameras was cut in. Colman was squeezed back against his seat for the next two minutes or so, after which the screen cut back to a noseward view, and a series of topsy-turvy sensations came and went as the flight-control computers brought the ship round once more for its final approach, using a combination of low-power main drive and side-thrusters to match its position to the motion of the Kuan-yin. After some minor corrections the shuttle was rotating with the Kuan-yin to give its occupants the feeling that they were lying on their backs, and nudging itself gently forward and upward to complete the maneuver. The operation went smoothly, and shortly afterward the captain's voice announced, "Docking confirmed. The boarding party is free to proceed.".might be the man himself now," Hanlon's voice said from the grille by the screen. "Ah, yes., ,a little the worse for wear, but he'll be as good as new." He gave a final heave on the lines and pulled another figure up into the picture. Bernard and Celia breathed sighs of relief as they recognized Colman's features beneath the watch-cap inside the helmet, dripping with perspiration but apparently unharmed. Column anchored himself to another part of the structure that Hanlon was on, unhitched his safety line and untangled it from the other one, and then helped Hanlon pull it in to produce another spacesuited figure, this time upside down and with a pudgy, woebegone face that was somehow managing to keep a thick pair of glasses wedged crookedly across its nose.."Hey, kid.".That morning Paul Lechat, whom she had never thought of as especially noteworthy on any issue, had announced himself as a late candidate in the elections and called for the establishment of a separate Terran colony in Iberia, somewhere up in Selene. He wanted to allow the people from Earth to pursue their own pattern of living without disruptive influences for the immediate future, and possibly to make such an institution permanent if it suited enough people to do so. To Jean the announcement had come as a godsend, and to many others as well, if the amount of popular support that had materialized from all sides within a matter of hours was anything to go by. Why couldn't everybody see it that way? she wondered. It was so obvious. Why were there always some who were obstinate and valued political interests before what common sense said would be for the common good, such as Kalens, who even now was reacting to Lechat as a threat and rallying his own followers to action?."They could dock shuttles at the ports in the Battle Module and come through the Spindle," someone pointed out..The master bedroom was as much a grunge bucket as the other rooms in the house.."Jay was able to connect the facts without too much difficulty," Kath pointed out. "We didn't try to hide them. Haven't the scientists on the ship done the same?".Brad nodded. "But Stormbel's people are in the cupola. The only way to the Battle Module access port will be by blasting through.". "And all these years of silence since then.". "We had to try," Wellesley insisted from beside Lechat. "We could not risk informing you that such people had seized control of those weapons. The decision was mine and nobody else's.".Kalens chewed on a slice of orange but made a face as if the fruit was bad. "But we've been publicly insulted," he objected. "What are you saying--that we should simply forget it? That would be unthinkable. What kind of a precedent would we be setting?".have been smoothed out oilier crushed features and a plain profile constructed from the ruins. "What about human beings crossed with wildly poisonous vipers?" Micky proposed..-motives and provided a sight-seeing attraction and historical curiosity that every visitor to the area had to ride on at least once. Veronica, a practicing architect, was there with Casey, Adam, and Barbara. Celia had declined to return to the ship but was watching from the home that she shared with Lechat - on the coast; and Wellesley had taken a trip from his farm in Occidena to see his old ship recommissioned and renamed..She wasn't an alcoholic, after all. She didn't drink or feel the need to drink every day. Stress and."Maybe you should try looking at it their way," Colman said.. "Of course they are. It's all a mess up there.". "Evidently so. I think I'll buy me a girl cat and call her Mr. Rover.".Just then, two Chironian girls strolled around the corner from the narrow corridor. They looked fresh

and pretty in loose blouses worn over snug-fitting slacks, and had lightweight stretch-boots of some silvery, lustrous material. One of them had brown, wavy hair with a reddish tint to it, and looked as if she were in her mid-thirties; the other was a blonde of perhaps twenty-two. For a split second, Driscoll felt an instinctive twinge of apprehension at the thought of looking ridiculous, but the girls showed no surprise. Instead they paused and looked at him not unpleasantly, but with a hint of reserve as if they wanted to smile but weren't quite sure if they should..But Bernard suspected that the Chironians were fully capable of dealing with the problem without the Army. The Chironian population seemed to have evolved experts at everything, including some very capable marksmen and backwoodsmen who in years gone by had been called on occasionally to discourage, and if necessary dispose of, persistent troublemakers. Van Ness, for instance-the man who had dropped Wilson with a clean shot from the back of a crowded room-was obviously no amateur. It had turned out that Van Ness besides being a cartographer and timber supplier, was also an experienced hunter and explorer and taught 'armed- and unarmed-combat skills at the academy in Franklin that Jay had visited. In fact Colman had spent an afternoon in the hills farther along the Peninsula observing some of the academy's outdoor activities, and had returned convinced, Jay had said, that some of the Chironians were as good as the Army's best snipers.. "Why is it the way it is? How does what you and I do in. Jersey have anything to do with my dad's job? It doesn't make any sense.".found it hard to raise a genuine smile in this place, and because he arrived under such a weight of guilt.Chapter 6."Well, I know he shot me, of course, but I have no memory of it. I remember him shooting Vernon, and.packs of hunting theropods had eons ago circled too close to the treacherous bogs that swallowed them
