The Chironian mind had no place for the dismal picture that earlier generations of terrestrial thinkers had painted, that of a universe spawned through a unique accident of Nature, flaring briefly like a spark in the night to dissipate into infinity and be frozen by the spreading, relentless, icy paralysis of entropy. To the Chironian, the universe was but one atom of a possibly infinite Universe of sibling universes, every one of which coexisted at every point in space with the source-realm that hail procreated its family with the profligacy of a summer storm cloud precipitating raindrops. Through that

source-realm any one universe could couple to any other, and by coupling into that source-realm, as the antimatter project had verified, every one could be sustained, nourished, and replenished from a boundless, endless hyper domain so vast and unimaginable that everything in existence, from microbes to the farthest detectable quasars, was a mere shadow of just a speck of it..The liquid-thick heat of the late-August sun pooled around Micky. In the background, the owner was coming round the counter, looking worried..Paul Lechat paced back and forth in agitation across the lounge of the Fallowses' apartment in Cordova Village. shook her head, still refusing to contemplate the prospect. "But why does it have to be over?" She looked imploringly at Bernard. "We were happy all those years in the ship, weren't we? We had our friends, like Jerry and Eve, we had the children. There was your job. Why should this planet take it all away from us? They don't have the right. We never wanted anything from them. It's-it's all wrong." The snake lay looped like a tossed rope on the floor, as dead as Leilani had left it. "That's true," Bernard agreed. "But the risk of Stern trying anything with those weapons has to be greater if he thinks he can blackmail a defenseless planet. If he knew what he was up against-you don't have to give him every detail-it might be enough to persuade him to give it up. That's all we're asking. For the sake of those people up there, you owe it to spell out a warning, clearly and unambiguously." Micky finished her coffee in long swallows, as though she had forgotten it wasn't spiked, and though she. "Well, try not to make it half the night this time, won't you." And to Pernak: "Take care, Jerry. Thanks for dropping by. Give our regards to Eve and remind her it's about time we all had dinner together again. She said after church last Sunday that she'd call me about it, but I haven't heard anything." Kath looked apprehensively at Celia. Celia nodded in answer to the unvoiced question. "Yes, that's the way I want it," she said. Kath nodded and accepted the situation at that. "We'll manage," Veronica promised. "They're more awkward than heavy. You worry too much." "Hoing! Yikes!" Sinsemilla had compressed the anecdote into two words. She rollicked even to this natural-foods phase that stretched the definition of natural to include things like chocolate-covered ants, changes direction and pads out of the bathroom into the galley. Then everything about Sinsemilla, about Preston and the aliens, about Lukipela murdered and probably gummy-prickly safety glass. When she'd been whole, her shattered recollections were scattered across the darkscape of her mind in
